CLARITY THROUGH ANALYSIS

NEO MATIME

CERTIFIED BUSINESS ANALYST

Randburg, Gauteng | (+27) 75 089 0614 | matime95@icloud.com |
https://www.linkedin.com/in/neomatime

CAREER OBJECTIVE

Ambitious Business & System Analyst passionate about leveraging emerging technologies to drive innovation and grow into a senior leadership role. Long-term goal: to transition into a Business/System Analyst Manager role focused on delivering strategic, data-informed solutions

PROFILE

Results-oriented IT Business Analyst with over 3 years of experience in the insurance and financial services sectors. I am skilled in business process optimization, requirements analysis, UX/UI design, and system enhancements. Known for effectively bridging the gap between business and IT through clear documentation, stakeholder collaboration, and data-driven decision-making. Proficient in SQL, Microsoft Office Suite, and Agile methodologies, with a proven ability to streamline workflows and boost system efficiency.

EXPERIENCE

BUSINESS ANALYST

Centurion | PSG Insure | September 2025 – Current

ACHIEVEMENTS & HIGHLIGHTS

- Serving as a Claims Business Analyst in the Platform Solutions team, focusing on the analysis and enhancement of claims-related systems and processes.
- Overlooking the production and functionality of the WhatsApp Claims Automation Project.
- Conducting UAT and production testing to validate system functionality and ensure solutions performed as intended.
- Creating detailed user story specifications to support enhancements and the implementation of new functionalities in claims solutions.
- Collaborating with external developers on the design and development of new system functionalities.
- Engaging with stakeholders to gather requirements, align expectations, and ensure successful delivery of claims solutions.
- Contributing to the CAB (Change Advisory Board) session prior to the deployment of new system functionalities and fixes

JUNIOR BUSINESS ANALYST

Parktown | Hollard Insure IT | May 2023 – August 2025

ACHIEVEMENTS + HIGHLIGHTS

- Led the automation of policy and survey workflows, achieving a 20% increase in operational efficiency.
- Facilitated JAD sessions and requirement alignment workshops across Product, IT, and Operations teams to drive clarity and consensus.
- Produced comprehensive documentation for system enhancements, leading to improved system efficiency and enhanced team performance.
- Optimized premium collections by leading the DebiCheck project.
- Facilitated requirements elicitation sessions with business and technical stakeholders to gather and clarify functional and non-functional requirements.
- Defined, analyzed, and documented clear, concise business and system requirements, including user stories, use cases, and functional specifications.
- Contributed as a support Business Analyst on the VAT Increase Project, collaborating with cross-functional teams to ensure smooth implementation of regulatory changes
- Contributed to business case development through impact assessments, cost–benefit inputs, and solution feasibility analysis.
- Ensured strict adherence to SDLC standards, including requirements traceability, documentation versioning, and stakeholder signoffs.
- Collaborated closely with testing teams by clarifying acceptance criteria, reviewing test coverage, and supporting defect triage.

BUSINESS ANALYST INTERN

Parktown | Hollard Insure IT | May 2022 – April 2023

ACHIEVEMENTS + HIGHLIGHTS

- Created data models and mapped data flows for reporting improvements.
- Supported Agile teams with sprint planning, backlog grooming, and user stories.
- Resolved system discrepancies through testing and collaborative troubleshooting.
- Facilitated cross-functional teamwork during system upgrades.
- Executed gap analysis to assess current vs. future state requirements during a migration initiative.
- Performed detailed claims data mapping to support seamless migration of legacy systems.
- Managed and tracked deliverables in alignment with both internal project management timelines and external industry deadlines.
- Developed BPMN process flows and UML diagrams to support clarity on system design, future-state processes, and migration initiatives in alignment with Enterprise Architecture principles.

KEY PROJECTS

WHATSAPP PROJECT (2025)

- Contributed to the WhatsApp Claims Automation project by monitoring production performance and validating that automated claim functionalities aligned with the existing claims system

VAT PROJECT (2025)

- Contributed to analysis and documentation for compliance updates following a national VAT change, aligning the policy administration system with regulatory requirements.

DEBICHECK PROJECT (2025)

- Led the DebiCheck project by introducing a solution to optimize premium collections, resulting in cost savings and improved approval efficiency for solution development.

HOLLARD FONT CHANGE PROJECT (2025)

- I served as Business Analyst on the Hollard Font Change Project for two insurance systems, gathering requirements and coordinating seamless integration of font updates while maintaining business functionality.

INSURANCE PRODUCT DEVELOPMENT (2024)

- Played a key role in the full product development lifecycle on the policy administration system, gathering business requirements, mapping processes, and coordinating with technical teams to ensure timely delivery and seamless system integration.

AI PROMPT ENGINEERING INITIATIVE (Hollard Nexus, 2024)

- Winner of internal Microsoft Copilot Prompt-a-thon. Developed AI-driven solutions for business queries using prompt engineering techniques and generative AI.

LEGACY-TO-NEW PLATFORM MIGRATION (Hollard Nexus, 2023)

- Supported the analysis and execution of the organization's migration project by assisting in gathering requirements, identifying gaps, and ensuring alignment between business needs and technical solutions.
